

Diesel Fuel Treatment | Diesel additive

Property

- keeps fuel systems free of deposits and ensures absolutely clean valve faces and seats
- regular use (every 1,000 km) conserves the power of new engines and improves the engine performance of used vehicles
- increases the cetane number (ease of ignition)
- reduces knocking, smoke and backfiring
- greater corrosion protection

Application area

- recommended for all diesel engines with and without turbo, catalytic converters or particle filters (DPF)

Dosage

- 1 x 375ml bottle is adequate for 50-80 litres of fuel. Add bottle contents to the fuel tank before filling.

Typical properties

Eigenschaft	Einheit	Wert
Color	-	brown

Available packaging

375 mL bottle	Case 12 x 375 mL bottles
